

# BRANDON WONG

New York, NY

☎ (917) 750-9908 ✉ [brandonwong.0719@gmail.com](mailto:brandonwong.0719@gmail.com) 🔗 [linkedin.com/in/brandon0719](https://www.linkedin.com/in/brandon0719) 🐙 [github.com/brandon0719](https://github.com/brandon0719) 🌐 [brandon0719.me](https://brandon0719.me)

## Education

### Stony Brook University

Aug 2022 - May 2026

*Bachelor of Science in Computer Science*

*Stony Brook, NY*

- Courses: Data Structures and Algorithms, Software Engineering, Operating Systems, Computer Networking, Programming Abstractions, Fundamentals of Software Development

## Work Experience

### Amazon Web Services (AWS)

May 2025 – Present

*Software Development Engineer Intern*

*Seattle, WA*

- AWS SFSC Security Enablement Engineering.

### Google

Feb 2025 – May 2025

*Basta G-SWEP Fellow*

*Remote*

- Engaged in **10 weeks** of pair programming and **mentorship** with a Google Software Engineer to strengthen problem-solving abilities, and enhance behavior and technical interview skills.

### Stony Brook University

Aug 2023 – May 2025

*Undergraduate Researcher*

*Stony Brook, NY*

- Programmed and deployed a **JavaScript**-based web application aggregating health data from **4 APIs**, visualized through **8** dynamic charts and heatmaps using Plotly.js, and streamlined medical research workflows by creating a tool to fetch **10+** relevant articles from Google Scholar.
- Identified key health trends by analyzing **40+** datasets with **R** and **JavaScript**, addressing challenges across **127** districts, and presented actionable insights and data visualizations to influence the direction of public health strategies.

## Projects

### Smart Parking System (P4SBU) | *Website* | *Source Code*

React | Node.js | PostgreSQL

- Designed the system architecture, data models, and UI models for the parking system using **Figma** and **draw.io**, building a full-stack solution with **PostgreSQL**, a **RESTful NodeJS** backend, and a secure **ReactJS** UI with **JWT**.
- Collaborated with **3** peers to deploy a scalable web app enhancing parking experiences of **20,000+** Stony Brook faculty, students, and visitors, incorporating **MapBox** for an interactive campus map with wayfinding-based parking suggestions, a user-profile-driven reservation system, and an admin dashboard for oversight.

### Phreddit | *Source Code*

React | Node.js | MongoDB

- Developed a full-stack social media platform supporting **1,000+** users to create posts, join communities, and engage in threaded discussions, using **JWT**-based authentication, a dynamic **React** frontend, scalable **MongoDB** storage, **Node.js** backend and an admin dashboard for user and content management.
- Implemented **CRUD** functionality to facilitate core features including community creation, threaded commenting, voting, context search, user profiles, and a reputation system, enhancing user engagement across the platform.

### Stock Tracker | *Source Code*

React | Node.js | MongoDB

- Architected and engineered a trading platform integrating **2 APIs** for live stock data and ticker symbol search, and created RESTful API endpoints to support **CRUD** operations, portfolio performance metrics, and trade history.
- Leveraged **Node-Cron** to automate consistent data refreshes for live stock prices used in portfolio metrics and stock information, ensuring compliance with API rate limiting.

## Leadership / Extracurricular

### ChinaBlue

Aug 2023 – Present

*Treasurer (2025–2026), Fundraising Head (2024–2025)*

*Stony Brook University*

- Managed a **\$10,000+** budget and spearheaded fundraising events, achieving a **125% profit** margin.
- Led weekly meetings to plan and execute events initiatives with a focus on collaboration and diverse impact.

## Technical Skills

**Languages:** Java, Python, HTML5, CSS, JavaScript, TypeScript, C

**Developer Tools:** AWS, Postman, Git, Agile, CI/CD

**Libraries/Frameworks:** NodeJS, ReactJS, PostgreSQL, MongoDB
